

SP SERIES

SPORTS PERIMETER SOLUTIONS

The SP series panels were specifically designed to comply with the latest UEFA requirements as well as the highest radiation immunity and emission regulations.

The SP system offers perfect operational stability even with external sources of electric and electromagnetic interference. The panels feature an automatic colour calibration system, which will adjust your content to the highest visual standard. The panels are also equipped with fail safe components to ensure flawless operation.

The SP Series system has an independent RCD Protection, making it absolutely safe to operate in the sporting fields. It is designed with rubber louvers and paddings to protect players from an injury.
